provide a portion of land at affordable rates for housing those poor people who provide essential services. This will also help in checking the growth of slums.

(iv) Urban Land use needs to be optimized. Town and Country planning regulations should be amended to provide for higher density use.

(v) Designation of no development zones in high population areas of cities and towns have led to the growth of slums. Planning authorities should re-plan these zones to meet the need of a growing population after taking adequate care for provision of green areas.
